

How to use WeTransfer

I like WeTransfer because it is very easy to use and because of the confirmation you get to reassure you that files have been uploaded and downloaded successfully. I still need your entry forms to be brought in on hand-in night, and if for any reason you are unsure then bring your images on a USB stick as before.

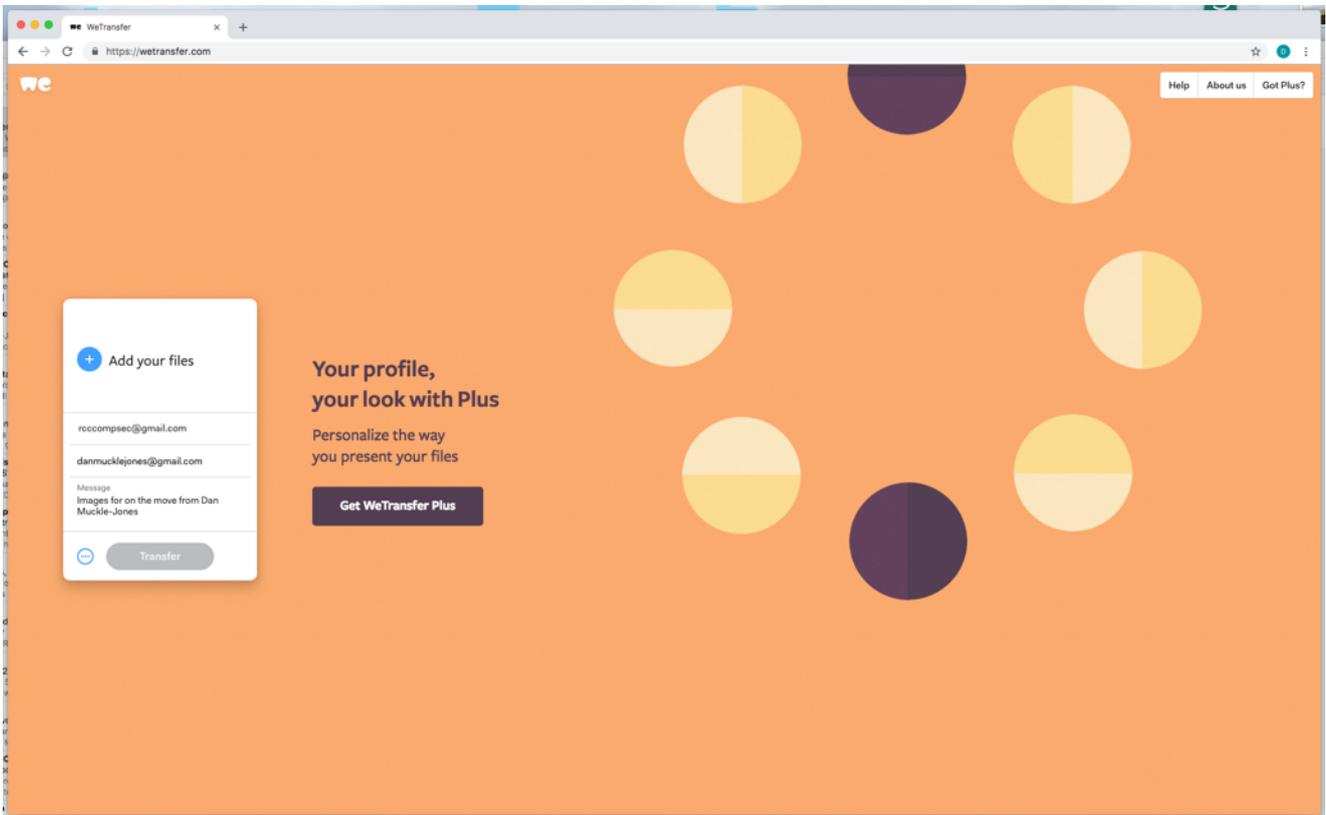

1. In your web browser, got to www.wetransfer.com. I'm using google chrome on a mac, but whatever you use you will get to a page like this, although the background image may vary

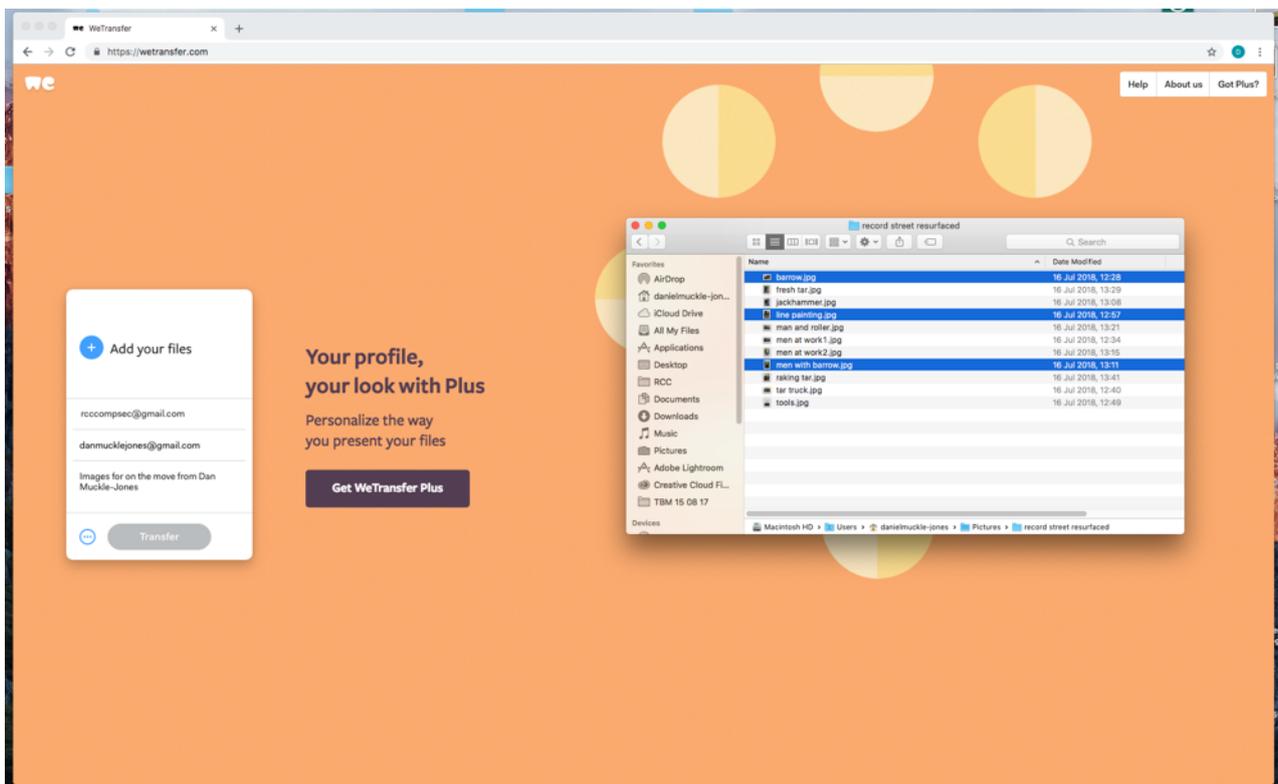

2. Click continue to go to the main interface:

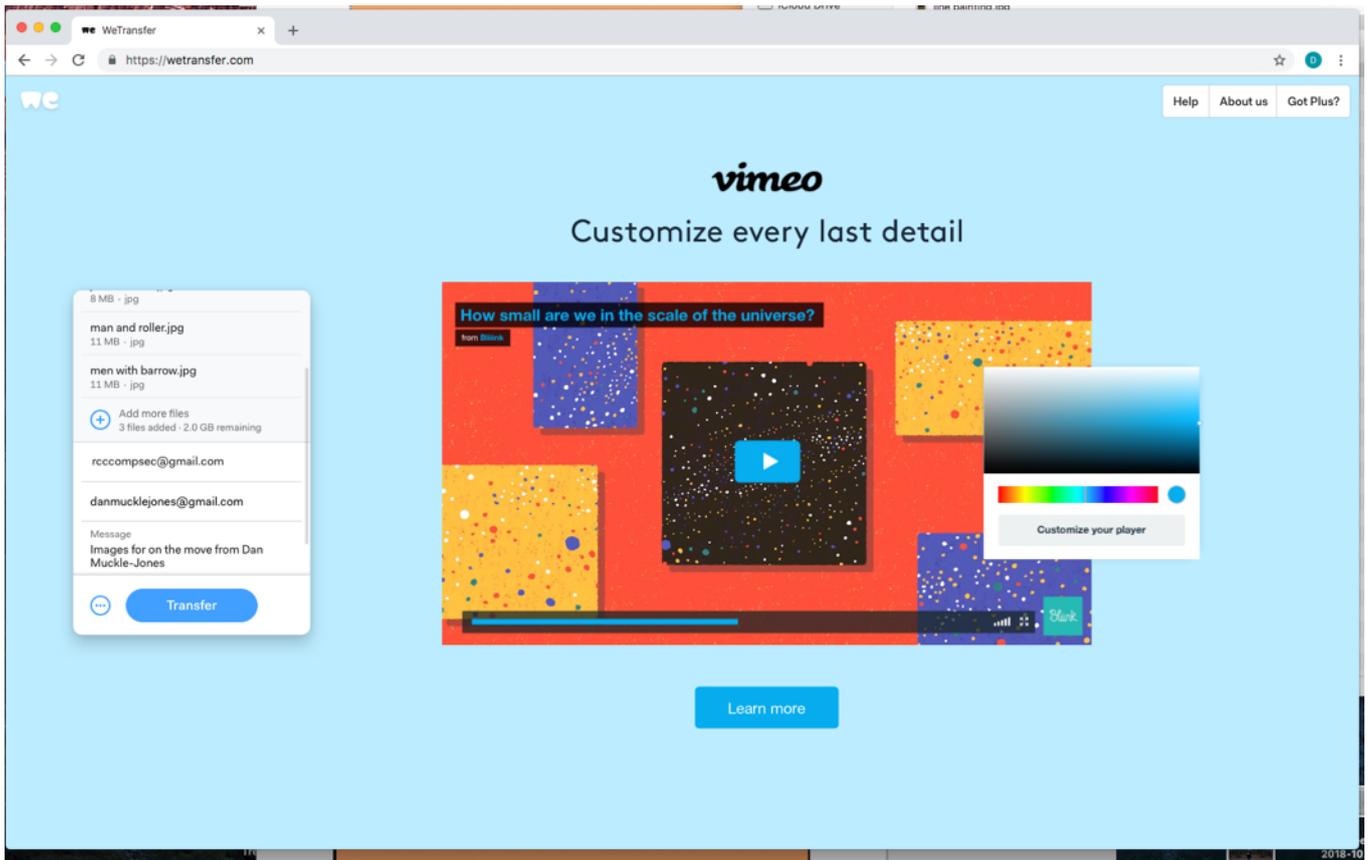

3. Enter the address the files are to be sent to - rccompsec@gmail.com
Enter your own e-mail address, and any short message for the competition secretary, I find it helpful to have your name and the competition title entered here:

4. Open your file browser to locate the pictures you want to send, and select them

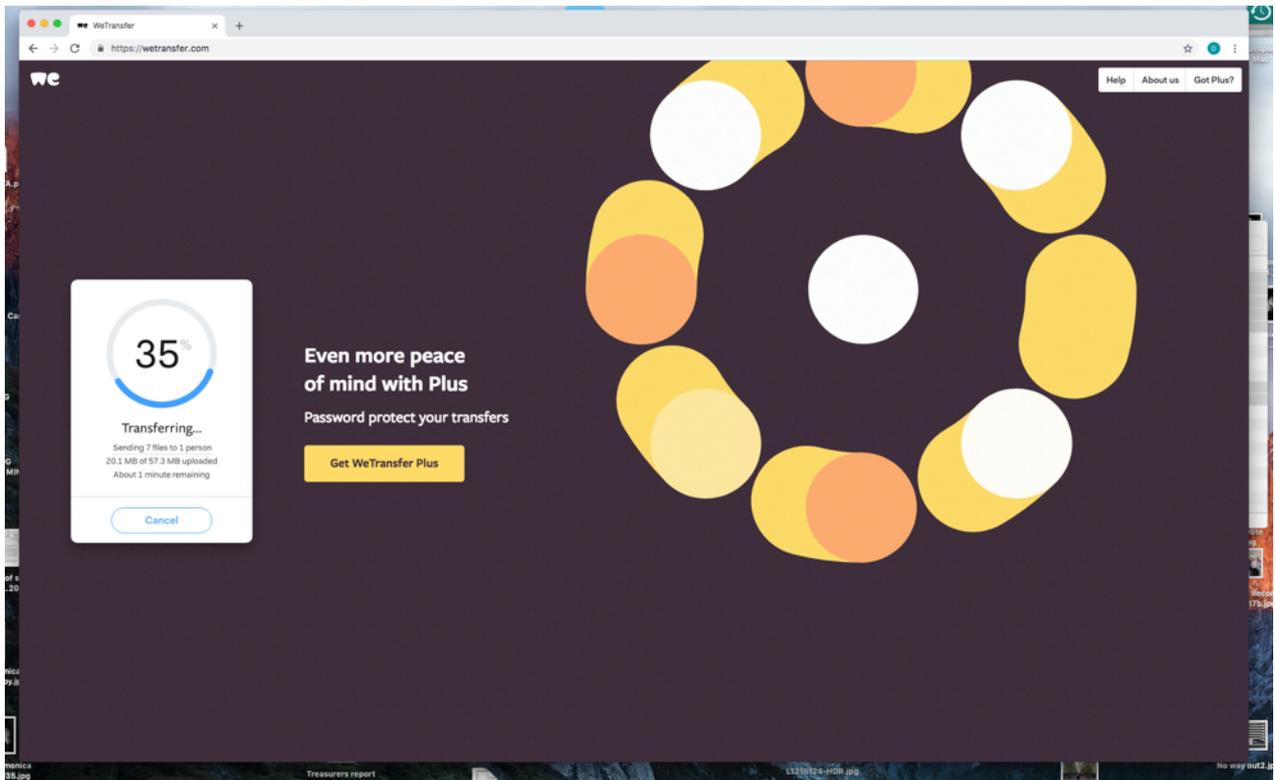

5. Simply drag the selected files to anywhere in the WeTransfer window and drop them.

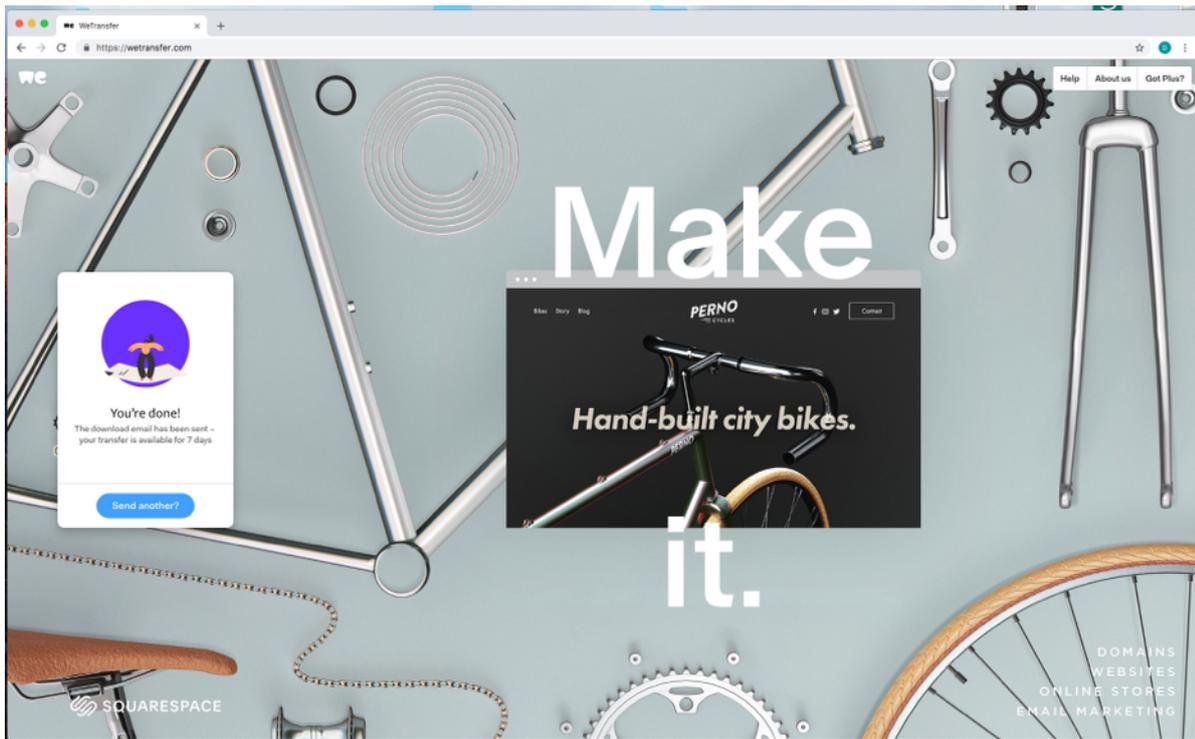

6. The images for upload will be listed in the window:

7. Click the blue Transfer button and the images will start uploading:

8. When completed you will get this message:

9. Within minutes, you will get an automatic e-mail from WeTransfer confirming that your files were uploaded successfully. If you don't get that, something has gone wrong.
10. You will get another automated confirmatory e-mail from WeTransfer when I download your files.

If you have any questions, please don't hesitate to contact me. I will continue to accept images on the night by USB stick, but if we can minimise this it will make hand in nights more relaxed!

Many thanks, Dan Muckle-Jones 17/10/2018.
